

# Connect to SAFILES - Mac OS X

1. In the Finder, go to the “Go” menu in the menu bar and click “Connect to Server...”

2. In the Address field, type “smb://safiles.ucsc.edu” and click Connect. To add SAFILES to your list of servers, click the “+” sign next to the address bar.

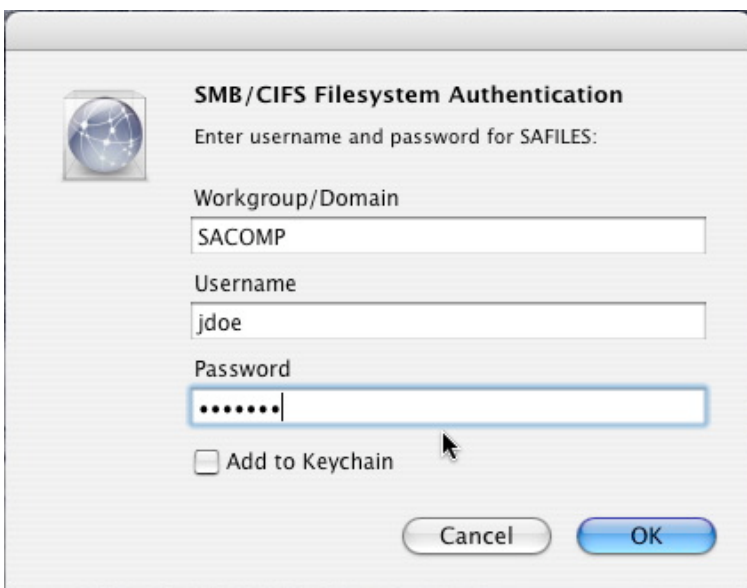

3. You should see the login dialog box

For “Workgroup/Domain” type: SACOMP

For “Username” type your SACOMP username (the same as your UCSC account name)

For “Password” type your SACOMP password. If you do not know your SACOMP password or you cannot connect, contact the Help Desk.

6. After connecting, you should see the SMB Mount dialog box. Select “Shared” from the pull-down menu and click OK. An icon for the share (labeled “Shared”) should appear on your desktop.
